AET Group Inc. Member Recognition

We are proud to recognize AET Group as a valued member of the Impact Network since 2011! AET Group is a BCorp environmental consultancy firm committed to their ecological, financial, and social responsibilities, working together collaboratively to find innovative solutions that work. AET group provides environmental consulting, auditing, and scientific services to the built and natural environments in their 13 core practice areas.

AET is committed to reaching Net Zero Carbon by 2030 across all of their operations through a variety of sustainability initiatives. This includes retrofitting their Kitchener office to a net zero carbon building, installing dual-head EV charging stations, fleet electrification, and engaging staff in internal sustainability programs. They are also focused on waste reduction, such as their nitrile glove recycling program, and have made the transition off natural gas with a cold climate heat pump and electric water heater. Additionally, they have enhanced onsite stormwater management and promote natural landscapes on-site.

Their future projects include becoming a net energy positive building with solar panels, planting 30,000 trees by 2030 through their 1% for the Trees Program, and further fleet electrification. Through these efforts, they are working toward a greener future for all and prove that they are a trusted partner for sustainable solutions that fully embodies sustainability in all decisions, actions and operations.

Direct quote from AET Group about the Impact Network: “Together, we’ve worked on initiatives that promote sustainable systems that align with SWR’s goal of transforming the local business community into a more sustainable and resilient ecosystem. AET’s involvement with SWR reflects our commitment to enhancing regional environmental stewardship while driving measurable progress in sustainability across the community. We value the partnership and relationship we have created over the years with SWR to drive sustainability not only through our own organization but throughout our community. We are always looking to partner with like-minded organizations like SWR, who share the same values and vision as AET. Together we will continue to push the sustainability boundaries and are looking forward to the continuation of our partnership with SWR to drive sustainability events further throughout our community.”

Through the Impact Network, AET has gained access to valuable learning opportunities, resources, and events that foster collaboration, networking, and knowledge-sharing within the sustainable community. They have benefited from connections with industry leaders and have been able to access funding for green

initiatives while also actively participating in peer-to-peer working groups. AET has also been engaged with SWR through co-hosting a sustainability reporting event and co-sponsoring SWR's microforests!

Thank you AET Group for your commitment to sustainability and for being a valued member of the Impact Network!
